

## **QuickSPOT Delivers the Big Apple: In Five Minutes or Less!**

### **All Mobile Video And On Call Communications Team Up To Provide Time Sensitive HD Video Uplinks In Manhattan.**

July 1, 2011, New York, New York and Foothill Ranch, CA: All Mobile Video (AMV) and On Call Communications announced a joint venture today to base an HD, IP based satellite news gathering van out of AMV's location on 26<sup>th</sup> Street in NYC. The joint venture will serve news and media organizations delivering High Definition and Standard Definition video directly to network studios or via [All Mobile Video's](#) downlink at Gateway where it can be picked up on fiber networks. News networks will be able to quickly broadcast live from the scene of breaking New York stories due to several advantages: the centrally located Mid-town base is convenient for all of lower Manhattan, the SNG van is more compact than traditional satellite trucks making it more maneuverable in crowded streets and the speedy, automated deployment of the QuickSPOT™ system puts crews on air within five minutes of arrival.

News stations need only send a reporter to the scene; the service package includes satellite van, video encoder, HD/SD camera, light kit, cameraperson/operator, IFB with Producer's line and Internet access. Because the system is automated, networks will enjoy lower daily rates for service as the savings are passed on to the news customers.

The new SNG vehicle is built around On Call's [QuickSPOT™ IP based satellite system](#). The system provides a high quality HD or SD Video feed from the vehicle as well as a full suite of mobile office functionality including voice lines, FTP, and Internet access.

On Call and All Mobile Video have already been working together as On Call uses AMV's Gateway for QuickSPOT's East Coast point of presence out of the New Jersey teleport and fibers feeds to the major POPs in New York City.

For more information on the service call Leonard Laxer at AMV 646-230-6996/917-299-0205 or our 24 hour TOC at 732-969-3191.

### **About On Call Communications**

On Call Communications specializes in mobile communications systems. It is a leading provider of rapid-deployment satellite systems and satellite bandwidth for satellite newsgathering, business continuity, disaster recovery, commercial and governmental clients. On Call offers an array of highly portable, auto-deploy antennas that can even be used for the most challenging of circumstances. With little more than a flip of the switch, they are ready to go wherever news breaks. Conveniently packaged, pre-configured baseband electronics allow users to connect video, phone and data applications within minutes of deployment. Learn more at <http://www.occsat.com/>.

### **About All Mobile Video**

All Mobile Video is the country's premier provider of end-to-end video and audio solutions for entertainment, sports, and news programming and events. We offer the full spectrum of services - from

spacious Manhattan based sound stages with full post-production capabilities to mobile production and editing trucks and extensive uplink solutions that travel worldwide- as well as an extensive equipment inventory that allows us to fully custom spec any facility or location.
